

**Righteous women were mentioned in the holy Quran, and iwa
defferd whether they are prophets or not: Mother of Moses and
Mariam Ibnat Imaran are examples**

Abstract: This study aimed to explain the face of right in the difference which happened between the people of the science in Mother of Moses and Mariam Ibnat Imaran may God be peace upon them . Are they prophets or not ? And after displaying the saying and evidences of objectors and discussing it in a scientific way in the Quran and Sunna , it showed that the scientists say that they are not prophets .

Not everyone was addressed by angels should be prophet or messenger , and not everyone who was inspired to should be a prophet or a messenger , because the inspiration has meanings in the language , the inspiration that happened to Musa's mother may God be peace upon her was inspiration and it is a saying of lots of scientists , but it is preponderant saying , and not as some scientists supposed that it is an inspiration of prophecy or message .

Keyword : *Prophecy, Revelation, Wisdom, Musa's mother, Mariam*
